

Abstract of the Disclosure

A golf club head which has a head volume V of not less than 300 cc, and a gravity point distance C (mm) satisfying the following condition: $C \leq 0.12 \times V^{-0.8}$, and optionally, the ratio (M/V) of the moment of inertia M ($\text{g} \cdot \text{sq.cm}$) of the club head around a vertical axis passing through the gravity point of the club head to the head volume V (cc) is set in a range of from 9.0 to 11.0, and a sweet spot height is set in a range of from 25 to 40 mm.
